Hebrew Comparisons

Written by Benjamin Lee Cooper

7 Edition 2

Uploaded on the 30th day of the 1st month of 2024 to https://press.barnesandnoble.com and https://learn-hebrew-from-genesis.weebly.com/ as a PDF file.

0.1 Copyright Notice

I Benjamin Lee Cooper place the following copyright on this and any digital or printed forms of any versions of this book which I made:

1: no digital or printed version can be sold at any time for any reasons, but donations can be accepted to those who provide this Ebook or Book, as long as this writing I made is supplied for free to people who do not wish to donate.

2: printings and digital copies can be made and distributed as long as they are never sold and follow all other rules listed here, and the printings or digital copies must not be edited by anyone other than me, Benjamin Lee Cooper, and must be an original file or print by Benjamin Lee Cooper.

3: No permission from Benjamin Lee Cooper is needed to print or distribute this document as long as the persons follow all other rules listed here.

0.2 Uses for this book

This book is essentially an enhanced Modern Hebrew dictionary listing words that do not appear in the Hebrew Tanakh, or are used differently in Modern times. It is not meant to be a complete or exhaustive list, and is only meant to contain common words, or words that I consider important. This dictionary can also be used for these other purposes:

- 1: To discover what stem a word belongs to.
- 2: To discover stems that other dictionaries do not recognize.
- 3: To compare Biblical words with modern meanings in some important situations.
 - 4. To learn what some phrases mean, and not just words.

0.3 Definitions

I refer to Biblical Hebrew as being anything in the Hebrew Tanakh, and any Hebrew that was written after the Biblical writings I refer to as Modern Hebrew, even if it might be best to refer to some of it as classical or something else. This is because it is easier to compare just two 'types' of Hebrew, instead of making a third type

for earlier writings that were still after the Biblical writings.

For the purposes of this dictionary or learning-aid (it is kind of both), a stem (also called root) is considered to be a Hebrew word that is at the most foundational level, in a three letter form. I have only seen two stems that have more than three letters, and they are 'b.w.w' 'to choose the left', and ו.ה.ה.ש' 'to worship'. They will be listed just like the three letter stems are.

I usually do not distinguish between verb froms like paal, hiphil, and etc, and I usually just list them all in the definitions section without specifying which type is which. This keeps this book shorter, but still shows the reader that that definition exists.

0.4 Translations

Most English translations of Biblical Hebrew will match the KJV translation instead of blindly matching any lexicon definition. In some cases the dictionaries or other sources have more accurate definitions due to the degradation of the English language over time.

When I have translated a Biblical Hebrew word in this book, I often use the same definitions that I use in my books "Counting Roots" and "Word Occurrence".

In rare cases there just may be more accurate definitions than what the KJV translators used. <u>Underlined definitions</u> mean they are the most frequently used definitions in the KJV or on less common occasions it means it is the definition that I believe is most accurate. I also underline some Modern Hebrew definitions if they are more common than others.

In the uncommon cases where a KJV definition of a word is not very accurate in my belief, I will list that definition in *italics*. Also in rare cases where I think the meaning should be something but the KJV uses a transliteration, I will list This meaning that I think is correct in *italics*. For Modern words when they have a prefix on the stem word, or in other cases, instead of adding the prefixed word to this list, I have added *italic* definitions for the Modern definitions of the same stem that word came from. This will keep this book smaller and will make it more efficient while still allowing a person to find a definition if they seek it.

If there are supposedly two stems with the same exact spelling, I treat them as the same stem listing but I will usually separate them into more than one line with separate definitions.

0.5 Words

The names of people or places are usually not going to be listed in this dictionary which is stem centered, because they are redundant in the sense that names have meanings based on the stems of the words that make up the name. Essentially, names are just transliterations and if you know what the stems already mean, you already know what the name means.

I will mostly be putting singular words in this list, and not plural words. This is because it is fairly easy to make a word plural usually just by adding a ים יס יס יס יס suffix. This means it would be redundant to list both the singular and plural versions of words.

Although in some cases both the singular feminine and masculine versions of a word might be beneficial, in most cases I will just be listed one of them., because it is often just a matter of adding a π or π at the end of a word.

I will not be listing many diminutives of words or some words with suffixes that have very similar meanings to the base noun or word that it comes from. This will allow this dictionary to be smaller and less redundant.

The Modern names for the Hebrew letters will not be listed in this book because they are listed in my book "Learning Hebrew from Genesis".

Usually what I call a transliteration is what most "experts" would call a "loan word". The phrase "loan word" does not describe the type of word as well as the word "transliteration" does, because these words truly are transliterations, and not a loan that will be paid back to somebody else. Perhaps "non-original" word might be better than "loan word" but still, "transliteration" is even better.

0.6 Syrian or sealed Hebrew

I don't believe the myth that there are Syrian or "Aramaic" words in the Hebrew Tanakh ('Old' Testament), if you want further information about This, read my book "What is Truth?".

In this book, I use the term "Syrian" to also sometimes mean "Assyrian", which again comes from my beliefs that I describe in "What is Truth?". In cases where it is very clear that a word comes from Assyrian, I would list it as being so.

Usually what others would call "Aramaic" words, I refer to them as sealed Hebrew words, which I describe more

0.7 Book Structure

This dictionary started out as an excel spreadsheet, which I then transferred to this chart in a .doc file.

For printed versions of this book, I recommend that you use a waterproof pen to make a mark on the outside of the pages where each new Hebrew letter in the alephbet starts. Then you can find words easier by starting with the correct Hebrew letter. I prefer to do this method myself with books when I can. It is quicker than going to a table of contents each time and then looking for a page number. This is one reason why I do no have a table of contents in this book.

0.8 Etymology

I originally was not interested in the etymology of words in this book, and instead had the main focus concerning if words did or did not come from the Biblical Hebrew. In more recent times I have became much more interested in identifying words that came from Arabic words. Now I have also seen the importance of investigating the etymology of words to find latin, Greek, Farsi, or other language sources for words.

Etymology is now a moderate goal for me in this book, but it will probably never be exhaustive or complete. The main goal of this book is still to identify if a Modern Hebrew word is, or is not in the Tanakh / Bible, and in some cases explain the changes that were made to Modern Hebrew words.

When I say Eliezer in this book it is referring to Eliezer ben Yehudah.

Often when I put "Not in the Tanakh" for notes about a word, it is often because there is no known etymology and I prefer to keep the focus in that case on the fact that it is not in the Tanakh.

0.9 Colors and formating

Blue is for Biblical Hebrew words that can be used instead of Modern Hebrew words.

Green is used for Modern words which look and/or sound similar to Biblical Hebrew words.

Pink is for words originating in Arabic, because it came directly from Hebrew long ago and is more useful for determining if it was part of the original Hebrew of Noach and Adam or not. Akkadian will also be listed in pink because I believe it also came directly from the original Hebrew of Noach. I believe that Phoenecian is an offshoot of Ancient Hebrew and so I will also list Phoenecian in pink.

Yellow is for Tanakh words that I am explaining a secondary meaning for.

<u>Underlined</u> words are used when there is another word in the list of meanings that does match the Tanakh meaning of the word. For Tanakh definitions I <u>underline</u> the most used definitions sometimes. Tanakh word translations that are half under<u>lined</u> are the second most used English definition.

"literally" as a beginning of a notes section for a row means it is not in the Tanakh and I try to give a literal meaning to the phrase.

0.10 My other books

Another book of mine relating to this book is 'Word Occurrences', which lists each group (what I call a Root Family) by their common stem, and then by their usage frequencies in the Bible. So, the most commonly used Root Family in the bible will be near the beginning of the book. The book is divided into 30 sections so that a person can review the words of each section each day of the month. A month of 29 days means you skip section 30, and a month of 31 days means you don't review any sections on day 31.

I have also written a complete Biblical Hebrew grammar book called 'Learning Hebrew from Genesis'. Another related book is my 'Counting Roots' Biblical Hebrew dictionary. You can find my books in PDF form in the links below:
